

IDEAS IN FLIGHT

From the Minds of NASA Aeronautics Scholars and Aeronautics Academies

TUESDAY, JULY 24, 2012, 8:30 AM-4:00 PM
WEDNESDAY, JULY 25, 2012, 8:30 AM-4:00 PM

James E. Webb Auditorium • NASA Headquarters • 300 E St, SW • Washington, DC

Intelligent aircraft engines? Carbon nanotubes? Advanced battery materials? They're among the aviation topics you'll hear about from NASA Aeronautics Scholarship summer interns and teams from the NASA Aeronautics Academies.

We challenged these young people to come to Washington DC to tell NASA how their summer work could make air transportation more safe and efficient for our nation.

It's a special opportunity for them to experience what it's like to present to a NASA audience, and for us to experience science, technology, engineering and mathematics from their points of view.

Visit this Web page for a full list of presenters and a timeline.
